

RAHMAN NENDHIARTO

Yogyakarta, Indonesia • rahmanarto634@gmail.com • (+62) 8224-4115-9116 • nendhi.dev

Data Science and Software Development professional specializing in Machine Learning, Deep Learning, and AI-driven application development. Experienced in designing predictive models, developing AI-powered applications, and building scalable web solutions through academic research, commercial projects, professional internships, and client collaborations. Skilled in delivering end-to-end AI-driven software solutions by integrating data preprocessing, predictive modeling, modern web development, and deployment into production-ready applications. Passionate about transforming complex data into reliable, maintainable, and user-centered digital products that create measurable real-world impact.

EDUCATION

Universitas Ahmad Dahlan

Yogyakarta, Indonesia

Bachelor of Informatics Engineering | GPA: 3.52/4.00

2022 - 2026

Relevant Coursework: Machine Learning, Artificial Intelligence, Software Engineering, Database Systems, Web Programming.

PROFESSIONAL EXPERIENCE

PT Suma Briket Premium

Lampung, Indonesia

Web Developer

Jul 2026 - Present

Designed, developed, and deployed the company's corporate website using Next.js, React.js, Tailwind CSS, and Vercel. Developed responsive and user-centered interfaces for company profiles, product showcases, production processes, and customer communication channels while optimizing website performance, accessibility, SEO readiness, and cross-device compatibility. Contributed to strengthening the company's digital presence and supporting international marketing initiatives through a modern and scalable web platform.

Universitas Ahmad Dahlan

Yogyakarta, Indonesia

Machine Learning Researcher

Jan 2025 - Present

Conducted an undergraduate research project under faculty supervision to develop an AI-powered PM2.5 air quality forecasting system. Managed the end-to-end machine learning workflow, including data collection, preprocessing, exploratory data analysis, feature engineering, LSTM-based predictive modeling, hyperparameter optimization using the Sine Cosine Algorithm (SCA), and model evaluation using RMSE, MAPE, and R^2 metrics. Collaborated with faculty supervisors and integrated the optimized prediction model into the UdaraCast web application using Laravel and MySQL. Achieved an RMSE of 0.1042, MAPE of 0.8847, and an R^2 score of 0.9787, demonstrating strong predictive performance and successful integration into an AI-based application.

Istana Sayur Buah

Manokwari, Indonesia

Lead Developer and Project Manager

Feb 2025 - Present

Led the end-to-end development of a business ready e-commerce platform, from requirement analysis to deployment. Managed project planning, coordinated development activities, and supervised technical implementation while designing system architecture, product catalog management, shopping workflows, database integration, and responsive user interfaces using Laravel, MySQL, JavaScript, and Bootstrap. Delivered a reliable digital commerce solution while improving stakeholder collaboration and supporting business digitalization.

Ministry of Industry of Indonesia

Yogyakarta, Indonesia

Full Stack Developer Intern

Oct 2025 - Jan 2026

Developed SIMAGANG, a web-based internship registration and management information system for BBSPJIKB Yogyakarta. Implemented frontend and backend functionalities, authentication systems, database integration, and workflow automation using Laravel, MySQL, JavaScript, and Bootstrap. Collaborated with stakeholders to deliver a scalable

and user-centered application that streamlined internship administration, digitized business processes, and improved operational efficiency.

SELECTED PROJECTS

UdaraCast **AI-Powered PM2.5 Air Quality Forecasting Platform**

Yogyakarta, Indonesia
Jan 2025 - Present

Worked as a Data Scientist and Software Developer in developing an AI-powered PM2.5 air quality forecasting platform using Python, TensorFlow, Laravel, and MySQL. Designed the end-to-end machine learning workflow, including data preprocessing, exploratory data analysis, feature engineering, LSTM-based predictive modeling, hyperparameter optimization using the Sine Cosine Algorithm (SCA), and model evaluation. Integrated the optimized prediction model into an interactive web platform with forecasting dashboards and data visualizations to support data-driven environmental monitoring. Achieved an RMSE of 0.1042, MAPE of 0.8847, and an R^2 score of 0.9787.

ExploreTrade **Global Product Sourcing Platform**

Yogyakarta, Indonesia
Jul 2025 - Present

Worked as a Software Developer in designing and developing a B2B digital platform that connects international buyers and suppliers using Next.js, React.js, Tailwind CSS, JavaScript, and Supabase. Developed core features including supplier discovery, product showcases, quotation management, and cloud database integration while implementing responsive user interfaces to support global sourcing activities and digital export promotion.

PT Suma Briket Premium **Corporate Website**

Lampung, Indonesia
Jul 2026 - Present

Worked as a Web Developer in designing and developing a modern corporate website using Next.js, React.js, Tailwind CSS, and Vercel. Built website structures including company profiles, product showcase pages, production process visualization, and customer communication features. Implemented responsive design, performance optimization, SEO readiness, and maintainable code architecture to support digital branding and business expansion for domestic and international audiences.

Pipe Thickness Loss Prediction Dashboard **Predictive Maintenance Dashboard**

Yogyakarta, Indonesia
Apr 2025 - Present

Worked as a Data Scientist in developing an AI-based predictive maintenance solution for industrial pipeline monitoring using Long Short-Term Memory (LSTM). Designed the machine learning workflow including data preprocessing, model development, training, and evaluation using Python, TensorFlow, and Google Colab. Developed an interactive prediction dashboard and data visualization using Plotly, achieving an R^2 score of 0.9795 for pipeline thickness loss prediction.

Istana Sayur Buah **E-Commerce Platform**

Manokwari, Indonesia
Feb 2025 - Present

Worked as a Lead Developer and Project Manager in leading the design and development of a web-based e-commerce platform using Laravel, MySQL, JavaScript, and Bootstrap. Managed project planning, system architecture, development workflow, and feature implementation while developing product management systems, database integration, and responsive user interfaces to support digital business operations and improve online product accessibility.

SIMAGANG **Internship Management Information System**

Yogyakarta, Indonesia
Okt 2025 - Jan 2026

Worked as a Full Stack Developer in developing a web-based internship management system for BBSPJIKB Yogyakarta, Ministry of Industry of Indonesia using Laravel, MySQL, JavaScript, and Bootstrap. Developed full-stack functionalities including authentication, internship registration, participant management, database integration, and administrative workflows to digitize internship processes and improve operational efficiency.

CERTIFICATIONS

Associate Data Scientist
National Professional Certification Board (BNSP)

Yogyakarta, Indonesia
Sep 2025 - Sep 2028

Successfully obtained the Associate Data Scientist professional certification by demonstrating competencies in data preprocessing, feature engineering, machine learning, predictive analytics, artificial intelligence, and model evaluation based on the Indonesian National Work Competency Standards (SKKNI).

Data Science Training Program
Digital Talent Scholarship - Vocational School Graduate
Academy (Komdigi)

Yogyakarta, Indonesia
Sep 2025

Completed a project-based data science training program covering the complete Data Science lifecycle, including data preprocessing, feature engineering, predictive modeling, machine learning, and model evaluation using Python, Pandas, Scikit-learn, and TensorFlow.

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, PHP, HTML5, CSS3

Data Science & Machine Learning: Pandas, NumPy, Scikit-learn, TensorFlow, Keras, Machine Learning, Deep Learning, Predictive Modeling, Data Preprocessing, Feature Engineering, Model Evaluation

Software Development: Laravel, React.js, Next.js, Node.js, Codelgniter, Tailwind CSS, Bootstrap

Database & Deployment: MySQL, Supabase, Vercel

Data Analytics & Visualization: Power BI, Tableau, Plotly

Development Tools: Visual Studio Code, Cursor, Git, GitHub, Google Colab, Figma, Draw.io, XAMPP
