

RAHMAN NENDHIARTO

Yogyakarta, Indonesia • rahmanarto634@gmail.com • (+62) 8224-4115-9116 • nendhi.dev

Data Science and Software Development professional specializing in Machine Learning, Deep Learning, and AI-driven software development. Experienced in designing predictive models, developing intelligent applications, and building scalable web solutions through research, professional experience, and software projects. Passionate about creating reliable, maintainable, and user-centered digital products that solve real-world challenges.

EDUCATION

Universitas Ahmad Dahlan

Yogyakarta, Indonesia

Bachelor of Informatics Engineering | GPA: 3.52/4.00

2022 – 2026

Relevant Coursework: Machine Learning, Artificial Intelligence, Software Engineering, Database Systems, Web Programming.

PROFESSIONAL EXPERIENCE

PT Suma Briket Premium

Lampung, Indonesia

Web Developer

Jul 2026 – Aug 2026 (Remote)

Led the development and deployment of the company's corporate website to strengthen its digital presence and support domestic and international marketing initiatives. Collaborated with stakeholders to translate business requirements into a modern, user-centered web platform while ensuring usability, accessibility, SEO readiness, and cross-device compatibility. Delivered a scalable solution that enhanced corporate branding and improved customer engagement.

Universitas Ahmad Dahlan

Yogyakarta, Indonesia

Machine Learning Researcher

Jan 2025 – Jun 2026 (On-site)

Conducted undergraduate research under faculty supervision to develop an AI-powered PM2.5 air quality forecasting system. Managed the complete research lifecycle, from problem formulation and experimentation to model validation and deployment. Collaborated with faculty supervisors to successfully integrate the optimized prediction model into the UdaraCast web application, achieving RMSE 0.1042, MAPE 0.8847, and R^2 0.9787, demonstrating strong predictive performance and practical applicability.

Istana Sayur Buah

Manokwari, Indonesia

Lead Developer and Project Manager

Feb 2025 – Jun 2026 (Remote)

Led the end-to-end delivery of a business-ready e-commerce platform by managing project planning, development coordination, technical execution, and deployment. Worked closely with stakeholders to align business objectives with technical solutions while ensuring project quality and timely delivery. Successfully delivered a scalable digital commerce platform that improved operational efficiency and accelerated the client's digital transformation.

Ministry of Industry of Indonesia

Yogyakarta, Indonesia

Full Stack Developer Intern

Oct 2025 – Jan 2026 (On-site)

Contributed to the development of SIMAGANG, a web-based internship registration and management information system for BBSPJIKB Yogyakarta. Collaborated with supervisors and stakeholders to digitize internship administration by streamlining participant registration, management workflows, and administrative processes. Delivered a reliable information system that improved operational efficiency, standardized business processes, and enhanced the overall internship management experience.

SELECTED PROJECTS

Udara Cast

Yogyakarta, Indonesia

AI-Powered PM2.5 Air Quality Forecasting Platform

Jan 2025 – Jun 2026

Engineered an AI-powered PM2.5 air quality forecasting platform using Python, TensorFlow, Laravel, and MySQL. Designed and implemented the complete machine learning pipeline, including data preprocessing, exploratory data

analysis, feature engineering, LSTM model development, hyperparameter optimization using the Sine Cosine Algorithm (SCA), and model evaluation. Integrated the optimized prediction model into an interactive web platform featuring forecasting dashboards and data visualizations, achieving RMSE 0.1042, MAPE 0.8847, and R^2 0.9787.

Samudra Supply

Purwokerto, Indonesia

B2B Export Marketplace Platform

Nov 2025 – Present

Designed and built a production-ready B2B export marketplace using Next.js, React.js, Tailwind CSS, and Vercel. Implemented supplier directories, commodity showcase pages, export information modules, and inquiry workflows while applying reusable component architecture, SEO optimization, and performance enhancements to support international trade.

CV Studio

Purwokerto, Indonesia

AI Resume Builder Platform

Jul 2026 – Present

Created an AI-powered resume builder using Next.js, React.js, Tailwind CSS, and Vercel. Built ATS-friendly resume templates, intuitive editing workflows, and responsive user interfaces while implementing reusable components, accessibility standards, and frontend performance optimization.

PT Suma Briket Premium

Lampung, Indonesia

Corporate Website

Jul 2026 – Aug 2026

Developed a modern corporate website using Next.js, React.js, Tailwind CSS, and Vercel. Built company profile pages, product showcases, production process visualization, and customer communication features while optimizing SEO, responsiveness, and overall web performance.

Pipe Thickness Loss Prediction Dashboard

Yogyakarta, Indonesia

Predictive Maintenance Dashboard

Apr 2025 – Jul 2026

Designed an AI-based predictive maintenance dashboard for industrial pipeline monitoring using Python, TensorFlow, Google Colab, and Plotly. Built an end-to-end LSTM prediction workflow and interactive visualization dashboard, achieving an R^2 score of 0.9795.

Istana Sayur Buah

Yogyakarta, Indonesia

E-Commerce Platform

Jan 2025 – Jun 2026

Architected a business-ready e-commerce platform using Laravel, MySQL, JavaScript, and Bootstrap. Designed product catalog management, shopping workflows, database integration, and responsive user interfaces to support scalable digital commerce operations.

SIMAGANG

Yogyakarta, Indonesia

Internship Management Information System

Oct 2025 – Jan 2026

Implemented a web-based internship management information system for BBSPJIKB Yogyakarta using Laravel, MySQL, JavaScript, and Bootstrap. Developed authentication, participant management, registration workflows, and administrative modules to streamline internship operations.

CERTIFICATIONS

Associate Data Scientist

Yogyakarta, Indonesia

National Professional Certification Board (BNSP)

Sep 2025 – Sep 2028

Successfully obtained the Associate Data Scientist professional certification by demonstrating competencies in data preprocessing, feature engineering, machine learning, predictive analytics, artificial intelligence, and model evaluation based on the Indonesian National Work Competency Standards (SKKNI).

Data Science Training Program

Yogyakarta, Indonesia

Digital Talent Scholarship - Vocational School Graduate

Sep 2025

Academy (Komdigi)

Completed a project-based data science training program covering the complete Data Science lifecycle, including data preprocessing, feature engineering, predictive modeling, machine learning, and model evaluation using Python, Pandas, Scikit-learn, and TensorFlow.

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, PHP, HTML5, CSS3

Data Science & Machine Learning: Pandas, NumPy, Scikit-learn, TensorFlow, Keras, Machine Learning, Deep Learning, Predictive Modeling, Data Preprocessing, Feature Engineering, Model Evaluation

Software Development: Laravel, React.js, Next.js, Node.js, CodeIgniter, Tailwind CSS, Bootstrap

Database & Deployment: MySQL, Supabase, Vercel

Data Analytics & Visualization: Power BI, Tableau, Plotly

Development Tools: Visual Studio Code, Cursor, Git, GitHub, Google Colab, Figma, Draw.io, XAMPP
